Why Learn AI Now!

Artificial Intelligence is transforming industries—from healthcare and finance to art and entertainment. Whether you're a beginner or an experienced professional, this course equips you with the practical and theoretical knowledge needed to excel in an AI-driven world.

What You'll Learn:

AI & Machine Learning Fundamentals

Neural Networks & Deep Learning

Natural Language Processing

Computer Vision

AI Ethics & Responsible Innovation

Building and Deploying AI Models

Duration: 2 Weeks

Mode: Online

Level: Beginner to Intermediate

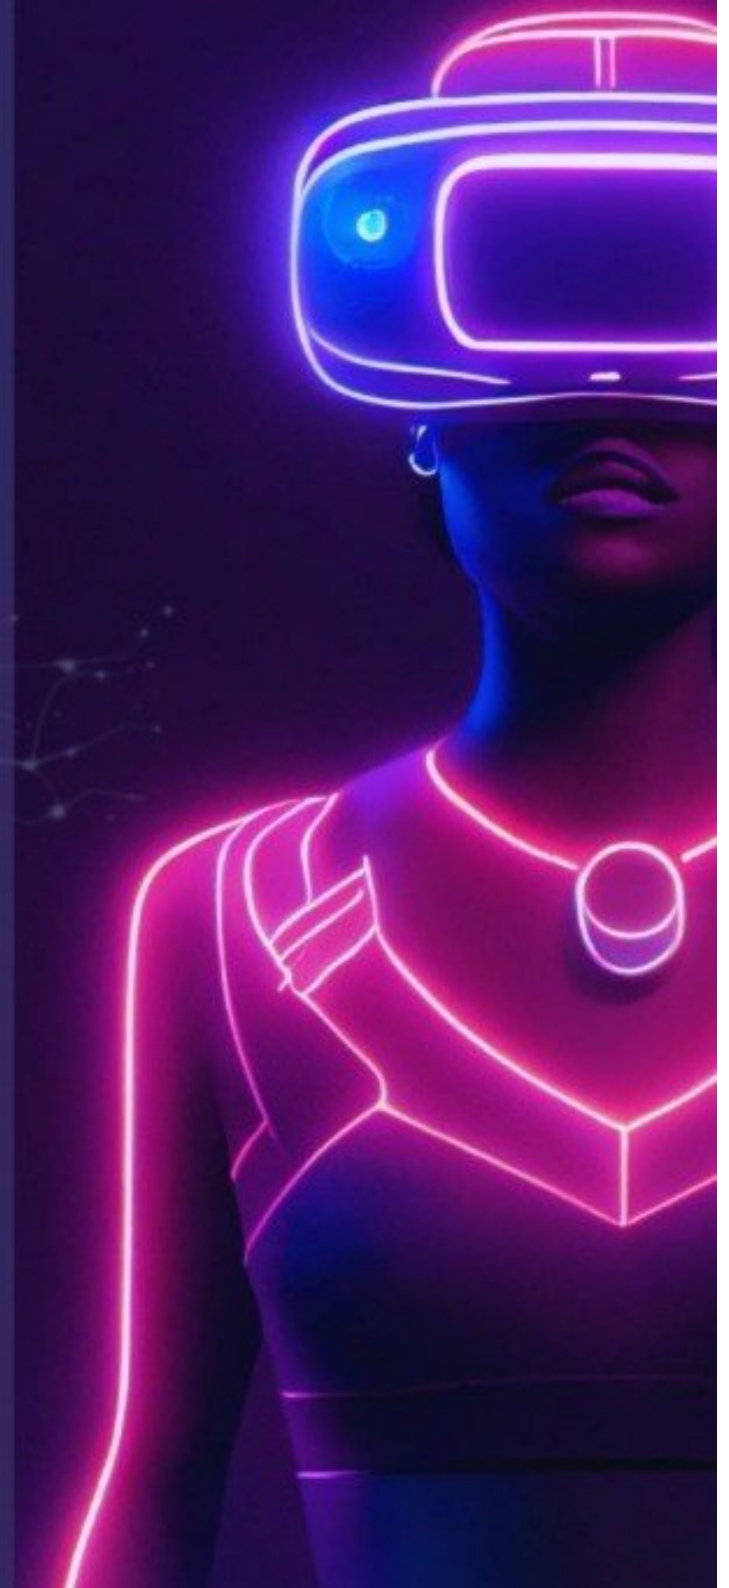

Format: Video lectures, quizzes, projects, and mentorship

COURSE CURRICULUM

MODULE 1:

Introduction to AI
History, evolution, and current trends
Key concepts: ML, DL, NLP

MODULE 2:

Python for AI
Python essentials for data science
Libraries: NumPy, pandas, scikit-learn

MODULE 3:

Machine Learning
Supervised & unsupervised learning
Model training and evaluation

MODULE 4:

Deep Learning
Neural networks with TensorFlow and Keras
CNNs, RNNs, and transfer learning

MODULE 5:

Natural Language Processing
Text preprocessing, sentiment analysis
Chatbots and transformer models (e.g., BERT)

MODULE 6:

Computer Vision
Image classification and object detection
Using OpenCV and convolutional models

MODULE 7:

AI in Practice
Capstone project
AI deployment on web/apps
Ethics & explainability in AI

LEARN FROM INDUSTRY EXPERTS
